DETAILED ACTION

Allowable Subject Matter

1. Claims 11-15, 27 and 29-33 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior art of record fails to fairly teach or suggest an apparatus capable of forming a first porous dielectric layer and a second capping layer on a semiconductor substrate, the apparatus comprising: atmospheric chemical vapor deposition chamber; a plasma system associated with the atmospheric deposition chamber; **a liquid coating chamber coupled to the atmospheric chemical vapor deposition chamber; a curing station coupled to the atmospheric chemical vapor deposition chamber;** and a substrate handling system adapted to transfer substrates between the atmospheric chemical vapor deposition chamber, the spin coating chamber and the curing station, wherein the spin coating chamber comprises a first material comprising a sol-gel solution used to form the first porous dielectric layer and wherein the atmospheric chemical vapor deposition chamber comprises a second material used to form the second capping layer, and wherein the curing chamber is capable of curing the sol-gel solution to form the first porous dielectric layer; **and wherein all processing stations are at atmospheric pressure and no vacuum pumps are present in the apparatus.** The closest piece of prior art is Bartholomew et al., which teaches an all atmospheric pressure apparatus; however, this reference fails to teach the apparatus comprising a liquid deposition chamber (i.e. a spin coating chamber or a ultrasonic spray deposition) and/or a curing chamber.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
